### **CHAKRAS**

***Wheels of energy that when balanced create inner and outer balance along with well being. Making it easier to accept and flow with life's lessons. When out of balance, there is a greater chance of emotional and physical dis-ease.***

***Emotions that unbalance the charkas are:  
FEAR (Fantasy, Expectations, Appearing, Real)  
Fear is when you have not used your knowing to  
understand the facts.***

# CHAKRAS

## *The 7 influencers of your life*

**Chakras** are believed to control energy and to draw it to them. This energy keeps the spiritual, mental, emotional, and physical health of your body balanced.

Each of your Chakras has its own unique “personality”, each controlling a specific aspect of your life. So if you’re experiencing any form of physical or mental shortcomings, limitations or challenges in your life, there’s a high chance one of your Chakras is weak.

Healing through Chakras can come from variety of places. You might be surprised to find out that even the foods you eat can effect your chakras and in turn the emotional and physical ailments that are associated with them.

Several modern healing techniques use Chakra points. Practices like aromatherapy, mantras, Reiki, hands healing, flower essence healing, sound therapy, light therapy, and crystal therapy all rely on balance at your energy points or chakras.

You can also fuel your chakras through visualization techniques. Similar to meditation, visualization allows energy to flow through your chakras. To do this you must be able to visualize at colour, like white light or one associated with a particular chakra coursing through your body.

How does Chakra Healing relate to other popular energy healing practices?

The breathing, stretching and meditative exercises used in [Yoga](#) are frequently targeted at the energy lines, or Chakras, flowing through the body.

By drawing on their personal energy systems, [Reiki](#) masters work on energy blocks within the body, with the intention of healing different aspects of people's lives.

Traditional Chinese healing sciences, like [Tai Chi](#), assert that the body has natural patterns of qi energy associated with it. Illnesses are seen as the product of disrupted or unbalanced qi movements.

The science of [Acupuncture](#) recognizes the Chakras, or as it calls them, the Taiji Pole, as the main energy conduit in the body. In many countries like France, Acupuncture is now an insurable medical practice.

[Qi Gong](#) is the Mandarin Chinese term for the Chakra System, and states that qi energy flows through energy channels known as meridians
